## Cea Liquid Mineral Salt

Cea Liquid Mineral Salt is a brilliant new product developed in Byron Bay, Australia. Specially prepared concentrated ocean water, Cea contains over 84 naturally balanced macro and trace minerals including calcium, iodine, iron, magnesium, and many others.

Cea – pronounced “Sea” – is a revolution in food and nutrition. It brings to your kitchen the ocean as a fundamental natural source of life’s nutrients and super food seasoning.

Seawater carries life information within the mineral ratios and vibrational frequencies of the water. The ionic elements of seawater activate the battery of electrical energy and communication through our bodies.

Dry salt is sterile salt; the life energy of seawater has been removed! The body recognises and utilises the life giving elements of Cea Liquid Mineral Salt at the cellular level. The ocean and its power of rejuvenation for the body and spirit are a real experience for us all.

Cea Liquid Mineral Salt is 100% natural. Nothing has been added. Our seawater is sourced from the pristine waters of the Coral Sea, site of the World’s largest World Heritage Area, The Great Barrier Reef.

Cea ocean water is concentrated via a network of ponds using solar evaporation. It is purified and energised using our unique process of micro-filtration and flow-form oxygenation to retain all the goodness of nature’s original source.

Cea liquid salt comes in a handy 250ml spray dispenser.

Spray Cea directly onto salads, roast vegetables, fish and meat. Squirt it into soups, sauces and stir fry dishes. Add to your favourite juice or water bottle for nature’s own electrolyte replacement sports drink. Use it to make bread. Add it to cooking water. Cea is a non-fermented, wheat-free mineral seasoning. All the family will love the sharp, clear flavour!!

Clearly ... the world’s best salt
