

Honey New Zealand

10+ Active

Organic Clover Honey

Wild Flora Honey

Manuka Honey

Honey New Zealand

Because of New Zealand's geographic isolation, it is free of bee diseases that are common in most other countries in the world. As a consequence, we do not feed our hives chemicals and additives that are used to control bee disease.

GE FREE ❁ RADIATION FREE ❁ 100% NATURAL

New Zealand has many honeys that are found nowhere else in the world, some of which have unusually high antibiotic and antioxidant properties. Granulated honey is also available, controlling the natural tendency of honey to crystallise. Granulation produces a fine, smooth honey.

Organic Clover Honey and Comb

- Appearance: Light pale gold
- Aroma: Herbal dry grass, hints of plums
- Flavour: Clean mild, sweet, traditional honey flavour

The secret to the smooth texture, delicate taste and creamy complexion is that it is virtually 100% clover. This degree of control over the floral source is unique due to the abundance of white clover flowers typical of the wilderness region where the organic hives are located in the crisp, clean alpine environment of Central Otago. The organic clover honey has achieved Biogro certification from the New Zealand Biological Producers and Consumers Council. This certifies that the honey is organic as it has met the rigorous and extensive monitoring and testing criteria of the organisation. These criteria include:

- Documentation of and consultation with every land user within a five kilometre radius of the organic hives to ensure that they remain free of chemical residue
- Regular analysis and testing of honey samples by the New Zealand Ministry of Agriculture
- Prevention of hives being fed with non-organic honey, sugar or antibiotics

Manuka Liquid Honey

- Appearance: Dark cream to dark brown
- Aroma: Catmint, damp earth, heather, aromatic
- Flavour: Mineral, slightly bitter, barley sugar, herbaceous

Honey New Zealand's native Manuka Honey is a dark, cream honey with unique anti-bacterial qualities. Manuka flowers have a strong aromatic fragrance and when freshly opened, are full of nectar and much sought after by the honey-bee.

Wild Flora Granulated & Liquid Honey

- Appearance: Pale lemon gold
- Aroma: Citrus, orange peel/orange blossom, intense
- Flavour: Intense floral flavour, sweet barley sugar

Wild Flora honey is made from a blend of unique wild pasture flowers that only grow in the Waikato Valley the centre of Honey New Zealand operations. This produces an amber honey with distinctive flavours appealing to all those who enjoy a pleasant variation on traditional honeys.

Gold Line 10+ Active

- Appearance: Pale lemon gold
- Aroma: Citrus, orange peel/orange blossom, intense
- Flavour: Intense floral flavour, sweet barley sugar

Gold Line 10+ Active Wild Flora Honey is tested and certified to have an antibiotic rating greater than 10 (equivalent % of phenol). This honey has been shown to be more effective than UMF Manuka honey against particular bacteria, and has also been shown to be high in antioxidants. 100% pure and unique to New Zealand.

Mountain Flora Comb Honey

Comb Honey is the most natural form of honey, just as the bees created it, pure and unprocessed. Sealed in the wax comb, the flavour of comb honey is unsurpassed. Biting into honeycomb releases a sweet, floral burst of honey.

Because it is unprocessed, the honey retains all of its remarkable health properties – including high vitamin and mineral content, and excellent antibacterial qualities. The wax comb is completely edible.
