## Organic Chocolate Products

Green & Black's is the world's first organic chocolate brand, established in 1991. They believe in organics and Fairtrade as a way to help third-world farmers. Plantation-grown cocoa is the most heavily-sprayed food crop on the planet. Plantation workers are routinely exposed to chemicals, and the farming practices lead to forest destruction.

Green & Black's rainforest-grown cocoa promotes biodiversity. The organic cocoa used in all of Green & Black's chocolate is grown by small scale, family farmers who sell their produce directly to co-operatives, guaranteeing them a regular income. This security of income has enabled them to improve their housing and, for the first time, send their children to secondary school.

Inspectors from the Fairtrade Foundation visit the cocoa growers regularly, to ensure that the project conforms with the strict guidelines, conditions and prices required for Green & Black's to carry the Fairtrade Mark.

Green & Black's, the award winning, quality organic chocolate, believes in a fair deal for farmers in the developing world.
